### IMMEDIATE, SELECTIVE DATA RETRIEVAL AND REPORT PRODUCTION

**SIGNET™** relates data directly to graphic information. You can selectively retrieve

and manipulate data for efficient report production.

### VARIABLY SCALED VIEWING AND PLOTTING

**SIGNET™** can easily accommodate an area the size of an entire state. Any portion of this area, from a specific

township to a single parcel of land, may be viewed and plotted at any scale the user may require.

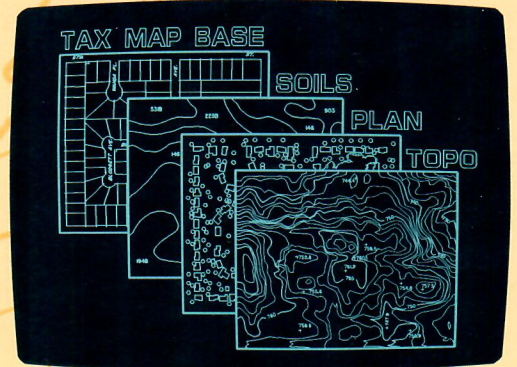

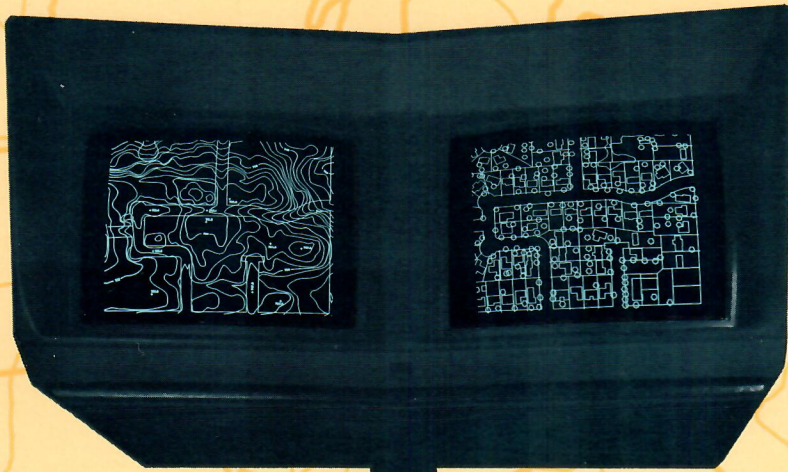

### SPECIALIZED

**SIGNET™** produces high quality precision plots on paper, mylar, or vellum. Color plots, accenting specific in-

## TIME AND SPACE SAVING

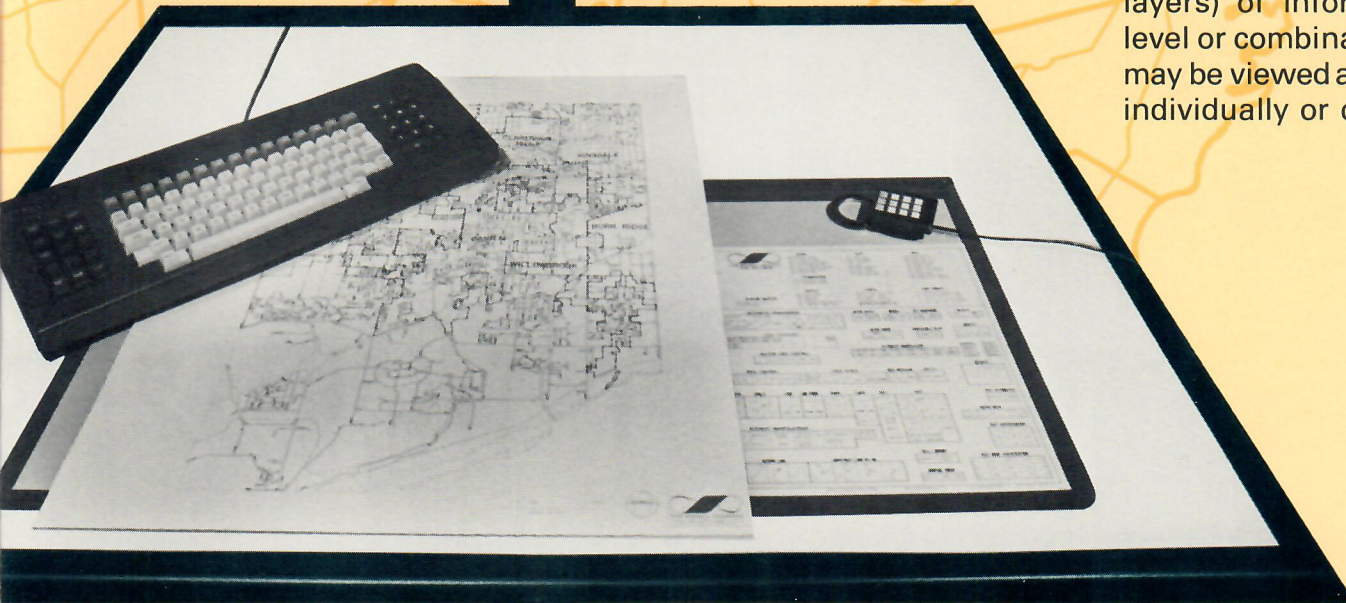

**SIGNET™** provides for the storage of many types of information, both graphic and alphanumeric. This information can be accessed

by a variety of users at the same time. Access time and user frustration are eliminated. File floor space is freed for other uses.

## SEPARATION OF INFORMATION INTO LEVELS

**SIGNET™** information is separated into levels (or layers) of information. Any level or combination of levels may be viewed and/or plotted individually or collectively.

## PLOTTING

formation may be produced with liquid, fiber, or roller pens.

## OUR COMMITMENT

**SIGNET™** has been designed to provide flexibility and user ease. Sidwell's professional staff will insure smooth implementation and integration

of your new system. **WE OFFER MORE THAN A SYSTEM, WE PROVIDE SERVICE.**
